HOUSE OF HOPE PROGRESSING TOWARD BECOMING SELF SUSTAINED

Since the inception of the "JESUS. Hobbs House of Hope" Children's Home, it has been our goal to one day become self sustained. It is our desire that the Africa project would be able to continue running for many years to come completely independent of funding from the United States. We will still be very much involved in the project and in the lives of the staff and children who make up JHHH. However we will not have the financial responsibility of continued provision. We are still not there, but the Lord continues to bless in such a way that this could be possible by 2012.

Poultry, livestock, vegetables and water are our current profit-making commodities. In addition to these things, we are now in the process of constructing a pond which will be stocked with Tilapia and Catfish!

RABBITS

VEGETABLES

COWS

GOATS

WATER

CHICKENS

UPDATE ON LAND BALANCE DUE BY JANUARY 2011

Due to the above projects, not to mention the 20 children who live and go to school at the House of Hope, we have been in desperate need of more property.

As reported in the last newsletter, God provided us with an additional five acres of land adjacent to our existing five acres. This in itself was miraculous, but then He also gave us favor with the owners of the property.

The sellers agreed to give us a **year and a half to pay the balance—interest free!**

BUT TIME IS RUNNING OUT! Back in July of 2009 that year and a half seemed like an eternity. Now that the deadline approaches, admittedly, our faith is being tested!

This offer will expire on January 31, 2011, at which time we will start accruing interest. PLEASE HELP US PAY THE BALANCE OF \$22,373 before the deadline.

Balance on "Hobbs House of Hope" Property
